Sunnyvale, CA | (669) 241-8492 | abhinita.sanabada@gmail.com | linkedin.com/in/abhinita-sanabada
github.com/Sanabada | Portfolio

Target: Data Engineering / Data Analyst Internship / Co-op | **M.S. Data Science:** Jan 2025–Dec 2026 (expected)

SKILLS

- **Languages:** Java, Python, SQL
 - **Data:** Kafka, Spark (PySpark), Airflow, ETL
 - **Warehousing/DB:** Snowflake, PostgreSQL, MySQL, Oracle, MongoDB
 - **ML:** scikit-learn, Pandas, NumPy
 - **Cloud/DevOps:** AWS, Azure, Docker, Kubernetes, CI/CD (Jenkins/GitHub Actions)
 - **Tools:** Git, Linux/Unix, JIRA, Splunk, ServiceNow, Tableau, Power BI
-

EXPERIENCE

Wells Fargo | Software Engineer (FCM)

Nov 2021 – Jan 2024

- Built Java/Spring MVC REST APIs for an **FCM (Futures Commission Merchant)** platform supporting **futures & options**; enabled trade/clearing/allocation feeds powering downstream **positions, margin, and risk** outputs with production logging/instrumentation.
- Developed and tuned **SQL stored procedures** for core transformations/aggregations; improved runtime via query tuning/indexing and supported **Azure migration + Dockerized deployments**.
- Orchestrated **EOD batch pipelines** using **AutoSys** on Linux/Unix (dependencies, retries, alerts, runbooks), improving run consistency and reducing manual reruns for risk-sensitive cycles.

SAP Labs | Software Development Engineer 2

Apr 2019 – Oct 2021

- Delivered an **automotive orchestration/scheduling** solution on **AWS HANA Cloud**; built services to ingest, validate, and serve operational data for global availability.
 - Led a **Kyma (Kubernetes)** POC; containerized services with **Docker** and improved scaling/diagnostics via deployment configuration and runtime troubleshooting.
 - Resolved production issues via hotfixes, monitoring, and ticket response using **ServiceNow** and **Splunk**.
-

PROJECTS

- **Real-Time SMS Spam Classification Pipeline** *Kafka, REST, Python* | GitHub
Built a Kafka + REST pipeline to score messages and trigger downstream actions; tracked precision/recall/F1, latency/drift, and added model/data versioning + logging for auditability.
- **Healthcare Affordability Finder System** *HDFS, MapReduce, PySpark, Spark ML, NLP* | GitHub
Built a big-data pipeline to ingest ~4GB CMS price data (13.6M rows) into ~47K standardized procedure rows; added semantic search (MiniLM embeddings) + Spark regression for predicted cash prices.
- **NYC Taxi Price Prediction** *Airflow, PySpark, Snowflake* | GitHub
Orchestrated taxi ETL with Airflow DAGs; performed PySpark cleansing/validation and loaded curated analytics tables into Snowflake using idempotent incremental runs and failure handling.

CERTIFICATIONS & ACTIVITIES

- AWS Fundamentals (certified); Microsoft Azure certification (fundamentals).
 - Employee Appreciation recognition at Wells Fargo; completed Andrew Ng's Machine Learning / ML Engineering coursework (Coursera).
-

EDUCATION

- **San José State University**, San Jose, CA Jan 2025 – Dec 2026 (expected)
M.S. Data Science | Relevant: ML, DL, GenAI, Big Data, Cloud, Databases, Distributed Systems, Algorithms
- **Biju Pattnaik University of Technology** Jun 2008 – Jun 2012
B.Tech. in Electronics and Communication Engineering
