

# Abhinita Sanabada

Sunnyvale, CA | (669) 241-8492 | abhinita.sanabada@gmail.com | LinkedIn | GitHub | Portfolio

**Target:** Data Science / Machine Learning / GenAI Internship

**M.S. Data Science:** Jan 2025–Dec 2026

## SUMMARY

Data Science graduate student with experience building machine learning models, data pipelines, and Generative AI applications. Skilled in Python, SQL, predictive modeling, NLP, and analytics with hands-on work across PySpark, Airflow, Tableau, Power BI, OpenAI, and LangChain.

## SKILLS

- **Languages:** Python, SQL, Java
- **Data Science / ML:** pandas, NumPy, scikit-learn, Spark ML, regression, classification, NLP
- **Generative AI:** OpenAI, LangChain, RAG, embeddings
- **Data Engineering:** PySpark, Airflow, Kafka, ETL
- **Visualization / Cloud:** Tableau, Power BI, matplotlib, AWS, Azure
- **Databases:** Snowflake, PostgreSQL, MySQL, MongoDB

## EXPERIENCE

### Wells Fargo

*Nov 2021 – Jan 2024*

Software Engineer (FCM)

- Built and optimized SQL-based transformation and aggregation pipelines supporting trade, margin, and risk reporting; improved runtime through query tuning and indexing.
- Developed data flows for trade, clearing, and allocation feeds, enabling downstream analytics for positions and risk-sensitive reporting.

### SAP Labs

*Apr 2019 – Oct 2021*

Software Development Engineer 2

- Built services on AWS HANA Cloud to ingest, validate, and serve operational data for an automotive orchestration and scheduling solution.
- Processed structured data for global scheduling workflows and improved deployment scalability through Docker, Kubernetes-based tooling, and production support.

## PROJECTS

### Healthcare Affordability Finder System / *HDFS, MapReduce, PySpark, Spark ML, NLP*

GitHub

- Built an end-to-end big-data pipeline to process about 4GB of CMS pricing data and transform 13.6M+ raw rows into about 47K standardized procedure-level records for affordability analysis.
- Performed exploratory analysis, implemented MiniLM-based semantic search, and trained Spark regression models to estimate cash prices for relevant healthcare procedures.

### LinkedIn Agentic AI Simulation / *React/Next.js, FastAPI, Kafka, MySQL, MongoDB, Redis, Docker, AWS*

GitHub

- Built a LinkedIn-style distributed platform supporting recruiter and member workflows including job search, applications, messaging, analytics dashboards, and real-time updates across microservices.
- Developed Kafka-orchestrated AI workflows for resume parsing and job-candidate matching with WebSocket progress streaming, event logging, Redis caching, and failure handling for scalable system behavior.

### Speech Emotion Recognition with Dialogue Context / *Python, CNN, BiLSTM, Attention, IEMOCAP, MELD*

GitHub

- Developed a lightweight speech emotion recognition model combining Log-Mel spectrogram CNN features, MFCC-based temporal features, dialogue-context encoding, BiLSTM, and attention to capture conversational emotion shifts.
- Trained and evaluated the model on IEMOCAP/MELD using focal loss, label smoothing, and augmentation, achieving **55.9% accuracy** and **52.4% Macro-F1** with real-time inference performance.

## CERTIFICATIONS

- AWS Fundamentals; Microsoft Azure Fundamentals; Andrew Ng Machine Learning / ML Engineering coursework

## EDUCATION

### San José State University, San Jose, CA

*Jan 2025 – Dec 2026*

M.S. Data Science

*Expected*

Relevant Coursework: Machine Learning, Deep Learning, Generative AI, Big Data, Cloud Computing, Databases

### Biju Pattnaik University of Technology

*Jun 2008 – Jun 2012*

B.Tech. in Electronics and Communication Engineering
